Mark Andreessen
founder of Netscape,
renowned Venture Capitalist
Andreessen-Horowitz

..”we are in the middle of a dramatic and broad technological and economic shift in which software companies are poised to take over large swathes of the economy”

„..in short, software is eating the world.”

..” over the next 10 years, I expect many more industries to be disrupted by software, with new world-beating Silicon Valley companies doing the disruption in more cases than no.”

2011 , Wall Street Journal

Why is this happening now (2011)

6

decades into the computer revolution

4

decades since the invention of the microprocessor

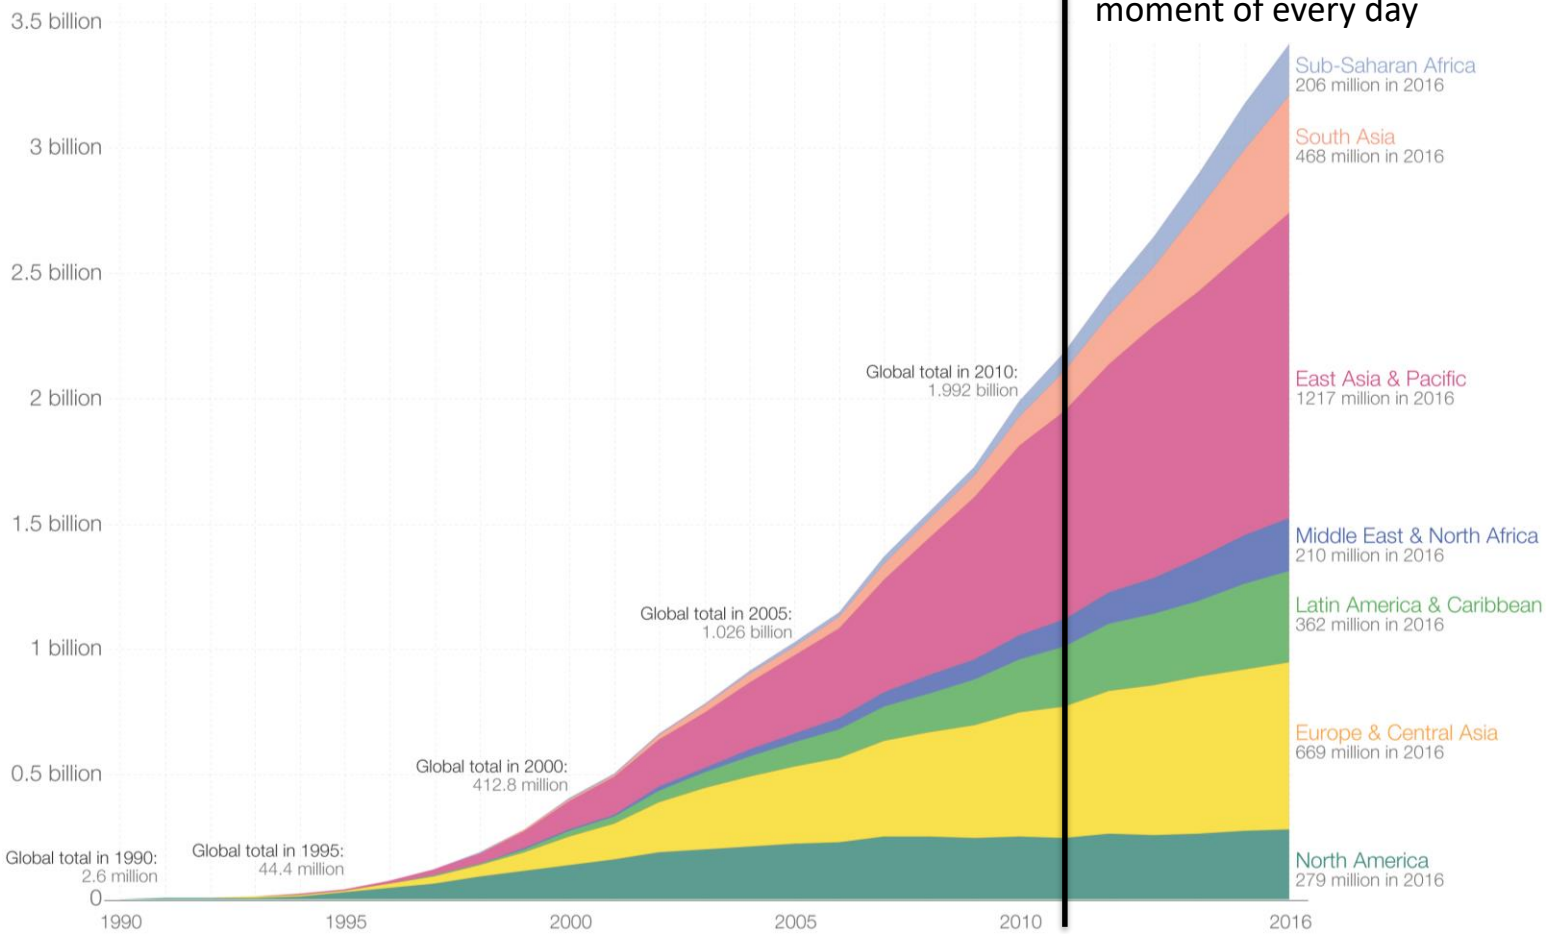
2

decades into the rise of the modern Internet

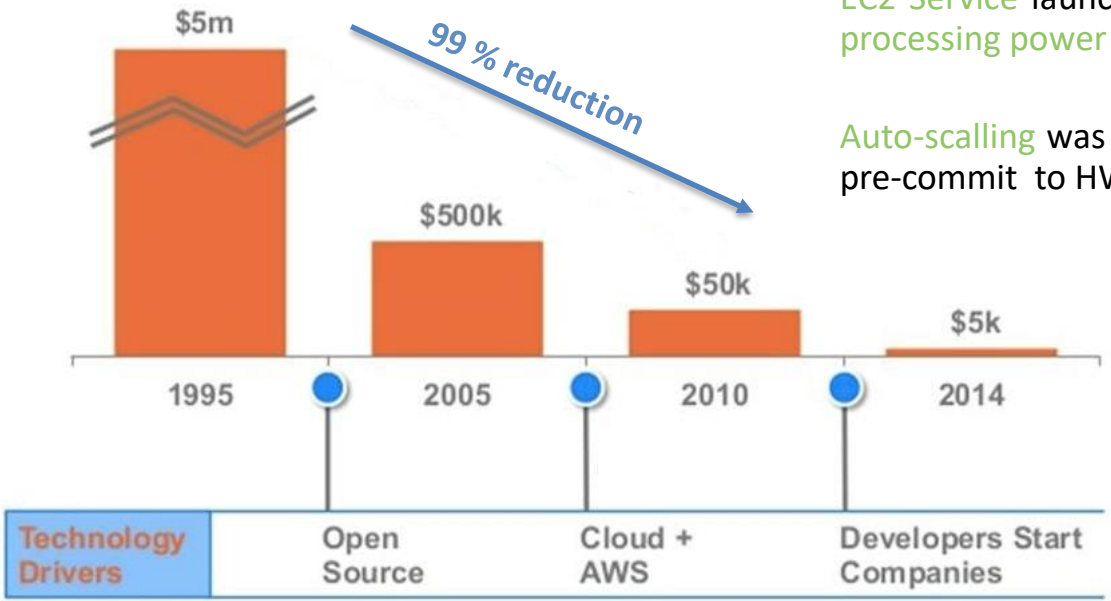
ALL of the technology required to transform industries through software finally works and can be widely delivered at global scale.

2+ billion people now use the Internet
up from 50 million a decade ago

in 10 years, 5+ billion people to own smartphones, giving them full & instant access to Internet, every moment of every day



Falling cost of launching a product



S3 Service was launched in 2006 which provided web storage eliminating the need for startups to invest in physical storage to build products

EC2 Service launched in 2006 that meant startups could have processing power in the cloud without buying HW

Auto-scalling was launched that meant startups didn't need to pre-commit to HW and could scale up and down with traffic.

amazon.com

BORDERS

Game changers

the world's largest bookseller, is a software company

largest video service by number of subscribers is a software company

Most dominant music companies are software companies, too

Disney had to buy Pixar, a software company, to remain relevant in animated movies

Any smarphone include a software-powered camera & photos are uploaded to the Internet

largest direct marketing platform is a software company

today's fastest growing recruiting company.

today's largest hotel booking platform

Noutăți legate de certificările AWS

Share Your Achievement with Enhanced Digital Badges

AWS Certification provides digital badges as a benefit to showcase your certification status. By making the transition to provide digital badges via Credly's Acclaim platform, we now offer more flexible options for recognition and verification. Take advantage of one-click sharing on social media newsfeeds, tools for embedding verifiable badges on websites, and an optional public profile with all earned AWS Certification badges.

Free Webinars on AWS Certification Exam Prep

Preparing for your next AWS Certification? Join one of our free, live webinars led by AWS-accredited instructors. A complement to our free Exam Readiness digital training courses, these webinars can help prepare you for AWS Certification by exploring main exam topics and identifying specific areas to study. Ask questions via chat during the Q&A, and feel confident on exam day.

AWS Certification Exams Now Available Virtually

You can now take all AWS Certification exams from the comfort of your home with online proctoring. With this added convenience and flexibility, it's now easier than ever to show your cloud skills are backed by an AWS Certification. For more information on this option, as well as other ways we are supporting candidates who need more time to reschedule exams, recertify, and use vouchers, visit our FAQ page.
